

Pinpoint key issues & opportunities

BUSINESS HEALTH CHECK

If you are to successfully grow and thrive, now is the time to take stock of the health of your business. Markets, access to talent and labour, the political environment and a host of other external influences will affect your business over the next couple of years.

You will need to differentiate, develop agile strategies and priorities against an ever changing environment to achieve your goals. Is your business ready? **Now is the right time to check!**

Work on your business in a highly productive **2-hour intensive 'Business Health Check'** session with one of our experienced Business Advisors. Prior to the online meeting you will complete at least two diagnostic tools to provide insight and understand the readiness of your business for change. You will walk away with a succinct, action plan to make the change you need.

What's the process?

Before our initial meeting we will send you two powerful diagnostic tools to complete:

- Growth & Profit Solutions Diagnostic
- Change Success Diagnostic

We will conduct our own research too so that we can 'hit the ground running'.

Using the results from the diagnostics and our own research, we will have a productive 1-2 hour meeting completing a NOW - WHERE - HOW analysis to:

- Understand what's working and what's not in your business NOW
- Clarify WHERE you want to be in the future based on your vision for the business in its "new normal"
- Determine the 3-4 key strategies on HOW to get there and the actions you need to take for change success to make it happen

Expect practical outcomes

- Facilitated online workshop by an experienced business advisor
- Walk away with a clear and concise report on the current state of your business outlining a summary of your health check results, strategies and actions to move forward.

Don't delay. Tackle your issues and make the most of your opportunities by booking a Leadership Health Check with us today.
