

Optimise your performance with a

LEADERSHIP HEALTH CHECK

Distributed workforces, online management, AI and other external forces are changing the way in which we work. The global talent shortage is placing leadership front and centre in professionals' choice of employer. Understanding our leadership attributes has never been more important if we are to continue to Adapt and Thrive. Take advantage of this opportunity to reflect on your current Leadership Performance in a highly productive 2 hour intensive "Leadership Health Check" session with one of our experienced Business Advisors. It's an opportunity to reflect on your current position and future needs.

What's the process?

Before our initial meeting we will send you two powerful diagnostic tools to complete:

- Leadership Diagnostic
- Personal Change Success Diagnostic

Using the results from the diagnostics and our own research we will have a productive 1-2 hour meeting complete a NOW - WHERE - HOW analysis to:

- Understand what's working and what's not NOW
- Clarify WHERE you want to be in the future based on your vision
- Determine the 3-4 key strategies on HOW to get there and the actions you need to take for personal change success to make it happen

Expect practical outcomes

Facilitated online workshop by an experienced business advisor

Walk away with a clear and concise report on the current state of your leadership outlining a summary of your health check results, strategies and actions to move forward.

Don't delay. Tackle your issues and make the most of your opportunities by booking a Leadership Health Check with us today.
